THE FUTURE OF RACE MANAGEMENT

Meet MarkSetBot Version 5

Our latest enhancements make race-day better than ever.

Hi there,

We're thrilled to share some exciting news with you! **MarkSetBot has just unveiled the next generation of our autonomous race system—MarkSetBot Version 5.**

This latest version is packed with with new enhancements designed to elevate your race-day experience, boost on-water performance, and minimize ongoing maintenance.

Paired with our [feature-packed app and unrivaled course-setting tools and technology integrations](#), the MarkSetBot v5 hardware upgrade is a game-changer. It's simple, fast, reliable, and precise, and we can't wait for you to see it in action. Check it out on the water at The America's Cup in Barcelona or throughout the upcoming season of SailGP.

There's no better time to bring MarkSetBot to your racecourse!

What's New in v5?

Speed and Strength: Unmatched Performance

MarkSetBot v5 is faster and stronger, with a more powerful motor that increases speed through the water. The v5 Bot takes on even more wind, waves and current.

Precision Perfected: Advanced GPS Accuracy

Version 5 features an enhanced GNSS/GPS system for pinpoint accuracy. A new chip and higher-end antenna enhance satellite reception for top performance.

Durability Redefined: Enhanced Topside Material

We've upgraded the topside for greater durability, offering long-lasting performance with minimal maintenance while still being easy to ship and store.

Seamless Setup: Faster and Easier Deployment

Version 5 introduces a quick-set motor mount and a new latching system, streamlining setup and making deployment faster and more effortless than ever.

Rapid Recharge: Faster Charging

Recharging is lightning-fast with v5's 3.5x faster charging capabilities.

Cutting-Edge Control: New Control Board and Sensor-Based Spin Preventor

At the core of Version 5 is a brand-new control board, enhancing reliability and enabling custom Bots projects with support for multiple thrust systems. Our sensor-based spin preventor improves precision and responsiveness, especially in light air and current.

Upgrade Your Existing Bots with Version 5 Enhancements

Already own MarkSetBots? You can still enjoy the benefits of Version 5!

Many of the v5 upgrades are modular and can be added to your current system. For example, you can upgrade your existing motor with the new control board or add the

tougher topside to your hull. Reach out to explore how you can bring v5 features to your racecourse.

**Ready to bring MarkSetBot's proven course-setting technology
to your club or event?**
